

SELECTOR GUIDE

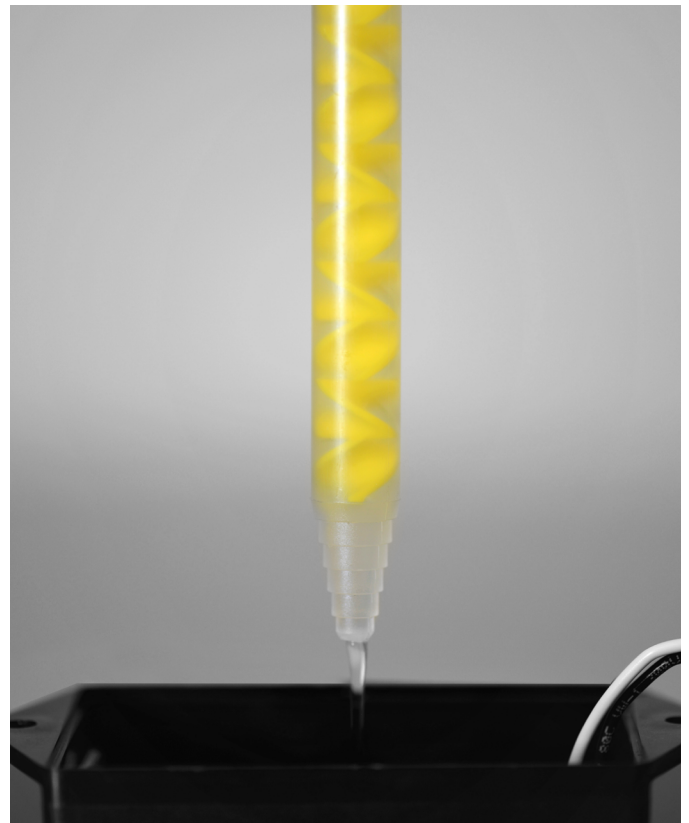

MEDMIX MIXPAC™ ME AND MS SERIES STATIC MIXERS

Ellsworth Adhesives offers a comprehensive line of medmix MIXPAC™ static mixers. As two-component adhesives are becoming more widely used in place of traditional fastening methods, there has been an increase in demand for proper dispensing systems.

MIXPAC™ Static Mixers provide:

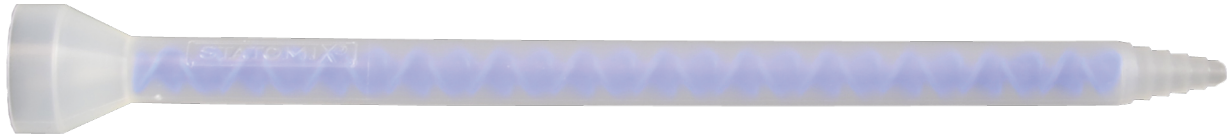

- Precise dispensing
- Controlled adhesive performance
- High-pressure dispensing tolerance

This selector guide describes our complete line of MIXPAC™ ME and MS-series static mixers. Use this guide to choose the best fit for your application.

MIXPAC™ ME and MS-series machine mixers (C-style) are molded with polyacetal to withstand the higher pressures from meter mix machines. Their bell mouth design is also suitable for quick and easy installation onto compatible C-style cartridge systems. Available in a wide variety of styles and tip designs, they provide an efficient method of mixing two-component adhesives and fluids for many different assembly and coating applications. The helical design supports dispensing a variety of epoxies, urethanes, acrylics and other assembly and coating materials.
